March 24, 1950

FARM PRODUCTION, DISPOSITION, CASH RECEIPTS AND GROSS INCOME FOR TURKEYS  
1948 - 49 1/

Turkey production in 1949 amounted to 41,666,000 birds, the Bureau of Agricultural Economics reports. This is 32 percent more than in 1948 and 21 percent above the 1938-47 average. Production was above that of 1948 in all States.

California was again the leading State in the production of turkeys, with 6,792,000 birds in 1949, followed by Texas with 4,162,000, Minnesota with 3,655,000, Iowa with 2,835,000, and Utah with 1,750,000. These 5 States accounted for 46 percent of the turkeys produced in 1949. The Western States, the largest producing area in the United States, produced 31 percent of the Nation's turkeys in 1949, the West North Central 26 percent, the South Central 13 percent, the East North Central 12 percent, the South Atlantic 10 percent and the North Atlantic 8 percent.

Turkey Sales Larger: Turkeys sold in 1949 numbered 40,288,000 birds -- 36 percent more than in 1948. About 5,540,000 of the turkeys sold in 1949 were carried over from the 1948 crop. Of these, 1,421,000 were late-market birds sold in January and February and 4,119,000 were breeder hens and toms sold after the breeding season, mostly in April and May. Of the 41,666,000 turkeys produced in 1949, about 1,611,000 late-market birds and 4,509,000 breeder hens and toms were carried into 1950.

Prices Lower: The average price received for turkeys sold in 1949 was 35.1 cents per pound live weight, compared with 46.7 cents in 1948. Turkey prices in January 1949 averaged 49.3 cents per pound, 10.4 cents more than in January 1948. However, with demand falling off and prospects for a considerable increase in the 1949 crop, prices began to drop. By mid-May the price had dropped to 36.9 cents, 0.4 cents under the price a year earlier. Monthly prices continued their downward trend reaching the lowest price of the year of 33.8 cents in August. The price increased only 1.5 cents from August to December compared with the 10-year average increase of 4.0 cents. On December 15 the price was 35.3 cents, 16.1 cents less than the price a year earlier.

Cash Receipts are Up: Cash receipts from the sale of 753,798,000 pounds (live weight) of turkey meat in 1949 amounted to \$264,671,000 -- 5 percent more than in 1948. A 39 percent increase from 1948 in the pounds of turkey sold more than offset a 25 percent decrease in the price per pound. Cash receipts in 1949 were only 2 percent less than the record high receipts in 1946.

Market Turkeys Slightly Heavier: Market turkeys averaged five tenths of a pound heavier in 1949 than in 1948. The average live weight per turkey sold has increased from 13.2 pounds in 1929 to 18.7 in 1949 because of the gradual increase in the proportion of broad-breasted birds. Hens averaged 14.2 pounds in 1949, compared with 13.9 in 1948 and toms averaged 23.2 pounds, compared with 22.5 in 1948.

Death Loss: Loss of poults in 1949 was 16.4 percent of those hatched, compared with 13.6 percent in 1948, the lowest of record, and the 1943-47 average of 23.9 percent. Because of better sanitary and management practices, poult losses gradually decreased from 29.7 percent of those hatched in 1943 to 13.6 percent in 1948. As the result of less favorable weather in 1949, the percentage death loss from disease and exposure was one fifth larger than in 1948. Breeder hen losses were 8.1 percent of the number on farms January 1, 1949 compared with 7.9 percent in 1948 and the 5-year average of 9.4 percent.
